STUDIES PROGRAM

Lesley-Ann L. Dupigny-Giroux, Ph.D.

Professor & Vermont State Climatologist
University of Vermont

**FRIDAY
NOVEMBER 17TH
3:00-4:00PM
KIVA Lecture Hall**

Dr. Dupigny-Giroux will explore the ways in which researching and teaching about climate change concepts and response strategies can be explored with an emphasis on human and geographic vulnerabilities, so that all peoples and ways of knowing are honored and incorporated. Lessons will be drawn from her use of geospatial technology in formal classroom settings and with lifelong learners to make climate change science inclusive and accessible.

Refreshments will be served at 2:30 in Bandelier East.

A reception will be held after the talk at Draft & Table in the SUB. Please RSVP using the QR Code.
