

Sherry V. Nelson

Anthropology  
svnelson@unm.edu

March 2025

**Educational History:**

B.S. 1994 Duke University Durham, North Carolina Biology (with a concentration in Evolutionary biology) / Biological Anthropology and Anatomy, *cum laude*

Ph.D. 2002 Harvard University Cambridge, Massachusetts Anthropology  
“Faunal and Environmental Change Surrounding the Extinction of *Sivapithecus*, a Miocene Hominoid, in the Siwaliks of Pakistan,” David Pilbeam, advisor

**Employment History:**

Postdoctoral research associate 2002-2004 University of Michigan Museum of Paleontology Ann Arbor, Michigan

Department Affiliate 2004-2007 Harvard University Department of Anthropology Cambridge, Massachusetts

Assistant Professor 2005-2007 Boston University Department of Anthropology Boston, Massachusetts

Assistant Professor 2007-2015 University of New Mexico Department of Anthropology Albuquerque, New Mexico

Department Affiliate 2013-current Harvard University Department of Human Evolutionary Biology Cambridge, Massachusetts

Associate Professor 2015-current University of New Mexico Department of Anthropology Albuquerque, New Mexico

Interim Chair 2024-current University of New Mexico Department of Anthropology Albuquerque, NM

**Professional Honors:**

1994-1997 National Science Foundation Graduate Research Fellowship

1996 Distinction in Teaching Award Harvard University

1997 Distinction in Teaching Award Harvard University

2002 American School of Prehistoric Research Award for Outstanding Ph.D. Thesis

2011 Research Semester Fellowship University of New Mexico

- 2013 University of New Mexico 2013 Top-Ten Research Stories
- 2016 Nominated, Outstanding Teacher of the Year, University of New Mexico

### **Short Description of Research, Teaching, and Service Interests:**

My research focuses on the interaction of climatic, vegetation, and faunal changes in the fossil record, particularly with respect to ape and hominin paleoecologies. I use stable isotopic and dental microwear analyses to reconstruct paleohabitats, climates, and diets. To better reconstruct the past, I also work with modern ecosystems. My goal is to have a direct comparison between fossil and modern data to better interpret fossil ape and hominin adaptations.

Much of my work focuses on Miocene apes, with a goal of determining whether they had habitat requirements similar to those of modern apes and thereby understand what role changing climate played in their extinction. If fossil apes differed in their habitat and dietary requirements from modern apes, then how, with similar body and brain sizes as well as life history regimes, could they ecologically afford to exploit harsher habitats? My work has included reconstructing ecological changes in the Siwaliks of Pakistan, a rare 20-million-year sequence in which to explore the ecology and demise of *Sivapithecus*. My fossil ape projects also include paleoecological reconstructions for two of the most enigmatic apes, *Oreopithecus* and *Gigantopithecus*. I am interested in *Oreopithecus* because it is found in Europe long after other apes there went extinct. A question remains, why did *Oreopithecus* survive outside of modern ape habitat range when no other ape could?

I also conduct isotopic analyses of fossil equids because they are essential to understanding the expansion of grasslands in the Miocene as well as changes in climate such as increasing seasonality. I have documented the oldest C<sub>4</sub> diet in Africa, and my work with fauna from a German Miocene site yields the first C<sub>4</sub> grassland dietary signal of faunas from Europe, suggesting the presence of grasslands where C<sub>4</sub> does not grow today.

To improve our resolution in paleoecological reconstructions, I analyze modern habitats, including isotopic analyses of fauna and vegetation from Kibale National Park, Uganda. This investigation has yielded insights in how isotopes can capture feeding behavior, habitat, life history, and social structure in the fossil record, including fossil apes and early human ancestors.

I enjoy teaching a suite of introductory and advanced courses focusing on understanding primate and human behavior and ecology through the process of evolution, the fossil record, primate socioecology, and modern forager ecology. At UNM, in addition to supporting graduate student research in my laboratory, over 20 undergraduates have conducted research, with eight producing honor's theses. In addition to teaching at the university, I enjoy providing outreach activities for students aged preschool through high school and working with the Maxwell Museum on informal science education.

**Books Authored:**

**Invited and Refereed Abstracts / Presentations at Professional Meetings:**

Reconstruction of paleoprecipitation regimes, and associated forests inhabited by *Sivapithecus*; S. Nelson; New England Biological Anthropology Symposium; Yale University; 2002.

Paleoenvironmental reconstructions with respect to the extinction of *Sivapithecus* in Pakistan; S. Nelson; American Association of Physical Anthropologists; Buffalo, New York; 2002.

The preferred habitats of *Sivapithecus* in the Siwaliks of Pakistan and paleoenvironmental changes leading to its extinction; S. Nelson; Asian Paleoprimateology Symposium; Primate Research Institute of Kyoto University, Japan; 2003.

Miocene paleoseasonality inferred from equid teeth and intra-tooth isotopic profiles; S. Nelson; Society of Vertebrate Paleontology; Minneapolis, Minnesota; 2003.

Dental microwear analyses of *Sivapithecus* and contemporaneous fauna; S. Nelson; American Association of Physical Anthropologists; Tampa, Florida; 2004.

A comparison of *Sivapithecus* and modern chimpanzee habitats, and environmental changes associated with the extinction of *Sivapithecus*; S. Nelson; International Geological Congress; Florence, Italy; 2004.

Testing models of faunal turnover with Neogene mammals from Pakistan; C. Badgley, S. Nelson, J. Barry, A. Behrensmeyer, and T. Cerling; Society of Vertebrate Paleontology; 2004

Isotopic reconstructions of Late Miocene climate, vegetation, and faunal change in the Siwaliks of Pakistan; S. Nelson; International Paleontological Congress, Beijing, China; 2006.

Evidence for habitat gradients using lateral variation in stable carbon isotope ratios within the Miocene Siwalik Sequence of Pakistan; M. Morgan, A. Behrensmeyer, C. Badgley, S. Nelson, and J. Barry; Society of Vertebrate Paleontology; 2006.

Dietary reconstructions of the Middle and Late Miocene ungulate communities in the Siwaliks, Pakistan; M. Belmaker, S. Nelson, M. Morgan, L. Flynn, J. Barry, D. Pilbeam, and C. Badgley; Paleoanthropology Society; 2007

Mesowear analysis of selenodont ungulates in the Middle to Late Miocene of the Siwaliks, Pakistan: dietary and paleoenvironmental implications; M. Belmaker, S. Nelson, M. Morgan, J. Barry, and C. Badgley; Society of Vertebrate Paleontology; 2007.

Reconstructing *Oreopithecus*' paleoecology by means of stable isotopic analyses. Preliminary data; S. Nelson and L. Rook; European Fossil Primates Colloquium; Italy; 2008.

Paleoecology of *Oreopithecus bambolii* faunas (Tuscany and Sardinia): stable isotopic analyses results; L. Rook and S. Nelson; Regional Committee on Mediterranean Neogene Stratigraphy; Italy; 2009.

Systematics and paleoecology of diverse species of Equidae from the Pleistocene locality of Makayuni, Northern Tanzania; D. Wolf, R. Bernor, T. Kaiser, S. Nelson, and G. Semprebon; Society of Vertebrate Paleontology; Great Britain; 2009.

Paleoecology of *Oreopithecus* faunas based on stable isotopic analyses; S. Nelson and L. Rook; American Association of Physical Anthropologists; Albuquerque, New Mexico; 2010.

Stable Isotopic Analyses of New Mexico Mummies with Multiple Tissues; C. Mitchell, C. Kieffer, K. Kitagawa, C. Mosley, P. Naranjo, S. Nelson, V. Atudorei, and H. Edgar; American Association of Physical Anthropologists; Minneapolis, Minnesota; 2011.

Paleoecology of *Gigantopithecus blacki* based on stable isotope analyses; S. Nelson; Southwestern Association of Biological Anthropologists, Tempe, Arizona; 2013.

How did Late Miocene rodents respond to changes in the grassland biome of southern Asia?; L. Flynn, Y. Kimura, and S. Nelson; North American Paleontological Convention, Gainesville, Florida; 2014.

The use of Bayesian-inference stable isotope mixing models to infer niche breadth in the fossil record: an extant study from Kibale National Park; M. Hamilton and S. Nelson; American Association of Physical Anthropologists, Calgary, Canada; 2014.

Paleoecology of *Oreopithecus* faunas based on stable isotope analyses; S. Nelson; Southwestern Association of Biological Anthropologists, Albuquerque, New Mexico; 2015.

Stable isotopes as a species and anthropogenic indicator in a Gold Rush-era Galapagos Tortoise and Sea Turtle from San Francisco, California; C. Conrad, L. Barcelo, E. Jones, S. Newsome, S. Nelson, J. Seminoff, K. Bruner, and A. Pastron; *Stable Isotopes in Zooarchaeology*, Athens, Georgia; 2016.

Strontium isotopes as indicators of philopatry/ dispersal patterns; M. Hamilton and S. Nelson; *American Association of Physical Anthropologists*, Austin, Texas; 2018

Differentiating frugivore and folivore diets using Sr/Ca ratios and non-destructive XRF analysis; M. Hamilton and S. Nelson; *American Association of Physical Anthropologists*, Cleveland, Ohio; 2019

Invited participant in workshop. Functional Trait Resource for Environmental Studies (FuTRES); Held virtually due to pandemic; 2020

Early life stress exposure and wide perikymata spaces using museum faunal collections. A Kennedy and S. Nelson; *Southwestern Association of Biological Anthropologists*, Tucson, Arizona; 2023

Primate teeth and early life stress: enamel defect occurrences in wild primates from the Kibale chimpanzee faunal collection; A Kennedy and S. Nelson; *Southwestern Association of Biological Anthropologists*, Albuquerque, New Mexico; 2024

**Field Research:**

1993-1994 Behavior of Black-and-White Ruffed Lemurs, Duke University Primate Center (Natural Habitat Enclosures)

1994 Communication in Carolina Chickadees, North Carolina

1994 Study of diet and behavior of howler monkeys, Costa Rica

1995 Paleontological excavation Kromdraai, South Africa

1996 Paleontological excavation Can Llobateres, Spain

1996 Paleontological excavation Sinap and Pasalar, Turkey

1996 Paleontological survey Siwalik sediments, Pakistan

2000 Paleontological survey Siwalik sediments, Pakistan

2002 Chimpanzee behavior and isotopic analyses of fauna, Kibale Forest, Uganda

2003 Dental microwear analyses of Hadza diets, Tanzania

2004 Chimpanzee behavior and isotopic analyses of fauna, Kibale Forest, Uganda

- 2014 Isotopic stratification in rainforest canopy and strontium variability of plants, Kibale Forest, Uganda
- 2015 Isotopic stratification in rainforest canopy and strontium variability of plants, Kibale Forest, Uganda
- 2016 Isotopic stratification in rainforest canopy and strontium variability of plants, Kibale Forest, Uganda
- 2017 Isotopic stratification in rainforest canopy and strontium variability of plants, Kibale Forest, Uganda
- 2018 Faunal isotopes, Kibale Forest, Uganda
- 2019 Faunal isotopes, Kibale Forest, Uganda

### **Classroom Teaching:**

1996-1998 Teaching Fellow at Harvard University – Human Evolution

1999 – Instructor at University of Connecticut “Aquanaut” Whale Communication and Oceanography Program

2003 Instructor at University of Michigan – Undergraduate Research Opportunity Program

2005-2007 at Boston University – Human Behavior and Evolution; Human Origins; Primate Evolution and Anatomy; Advanced Topics in Human Behavioral Evolution; Graduate Proseminar in Anthropology

2007-current at University of New Mexico – Introduction to Biological Anthropology; Human Evolution; Paleoecology Lab; Paleoanthropology; Primate Evolution; Human Behavioral Evolution; Topics in Paleoecology; Humans and the Environment; Topics in Interdisciplinary Biology and Biomedical Sciences; Guest lectures in – Chimpanzees and Human Evolution; Elemental Ecology; Science in Archaeology; Seminar in Interdisciplinary Biology and Biomedical Sciences; Topics: Career Planning

### **Service:**

1995-1999 Harvard Earth History and Paleontology (EHAP) seminar series coordinator

1999 Instructor, University of Connecticut “Aquanaut” Whale Communication and Oceanography Program

2003 Consultant for television series “Miracle Planet – the Evolution of Our World,” Japan Broadcasting Corporation and the National Film Board of Canada

2006 Mentor, Weston High School Senior Internship Program

2007-2009 University of New Mexico Anthropology departmental seminar series coordinator

2007-current Manager of the University of New Mexico Anthropology cast collection

2007-2015 affiliated faculty Program in Interdisciplinary Biological and Biomedical Sciences (PIBBS)

- 2008 “*Sivapithecus*: the life and death of a Miocene ape.” Ancestors Lecture, Maxwell Museum of Anthropology, University of New Mexico.
- 2008 Consultant in workshop to develop new Maxwell Museum human evolution exhibit.
- 2008 “*Sivapithecus*: Reconstructing the life of a Miocene ape.” Summer Science Program, Socorro, New Mexico.
- 2009 “Miocene: Dawn and demise of the apes.” Seminar series, Department of Earth and Planetary Sciences, University of New Mexico.
- 2010 Radio interview for NPR, Pasadena. The discovery of *Australopithecus sediba*.
- 2010 Café Scientifique. “The human fossil record: interpreting behavior from bones.” Four presentations to high school students in Los Alamos, Espanola, Albuquerque, and Santa Fe, New Mexico.
- 2011 Fossils presentation; Albuquerque elementary school
- 2011 “What makes us human? Inferences from the fossil record.” Summer Science Program, Socorro, New Mexico
- 2011-present Resource Allocations Committee
- 2012 Fossils presentation; Albuquerque elementary school
- 2012 Science fair. Albuquerque elementary school
- 2012-2013 Search Committee, assistant professor position, Dept. Anthropology
- 2013-2024 Continuing non-tenure track faculty review committee
- 2013 Teeth and skulls presentation. Albuquerque elementary school
- 2013 Fossil presentation – Maxwell Museum summer camp
- 2013-2014 Consultant for documentary “Life Force – Borneo,” Natural History New Zealand
- 2014-current Advisory Committee, Center for Stable Isotopes
- 2015-2021 Convener, Evolutionary Anthropology
- 2015-2024 Advisory Group, Department of Anthropology

- 2015-2016 Panelist, National Science Foundation Graduate Research Fellowship,  
Ecology
- 2016 Human evolution and fossil presentation – five Earth Science classes,  
Albuquerque middle school
- 2016-2017 Panelist, National Science Foundation Graduate Research Fellowship,  
Anthropology
- 2017 Fossil presentation, Albuquerque preschool
- 2017-2018 Panelist, National Science Foundation Graduate Research Fellowship,  
Ecology
- 2017-2018 Search committee, assistant professor position, Department of Anthropology
- 2017-2018 Sabbatical committee, University of New Mexico
- 2018 STEM mentorship mix and match event for undergraduates
- 2018 Principles of evolution presentation – five Biology classes, Albuquerque middle  
school
- 2018 “Chimpanzees, isotopes, and the transition from ape to human.” New Mexico  
Museum of Natural History and Science, Albuquerque, New Mexico
- 2018-2019 Search committee, assistant professor position, Department of Anthropology
- 2018-2019 Panelist, National Science Foundation Graduate Research Fellowship,  
Ecology
- 2018 Lead content advisor, human evolution exhibit NSF grant proposal Maxwell  
Museum
- 2019 STEM mentorship mix and match event for undergraduates
- 2019 Human evolution presentation, Albuquerque preschool (2)
- 2019 Content advisor, bipedalism display, Maxwell Museum
- 2019-2022 Annual Review Committee, Catherine Rhodes
- 2019 Teaching evaluation, Catherine Rhodes

2019-2020 Panelist, National Science Foundation Graduate Research Fellowship,  
Ecology

2020 Presenter, Maxwell Museum Passport to People: Bones and Stones, Footprints  
and Fossils Family Fun Day

2020 Children's Hour radio program, Apes and Human Ancestors

2020 Presenter, Maxwell Museum Ancestors Virtual Exhibit

2020-2021 Panelist, National Science Foundation Graduate Research Fellowship,  
Ecology

2020-2024 Annual Review Committee, Ian Wallace

2020 Teaching evaluation (2), Catherine Rhodes

2020 Teaching evaluation, Keith Hunley

2020 Teaching evaluation, Melissa Emery Thompson

2021-2024 Associate Editor, *Journal of Human Evolution*

2021 Consultant for *New Scientist* article

2021 Reviewer for promotion to Research Full Professor case, University of Utah  
Department of Geology and Geophysics

2021 Annual Review teaching, Catherine Rhodes

2021 Annual Review service, Ian Wallace

2021-2024 Associate Chair, Department of Anthropology
